### Summary of reasons for decision:

The computer moving image file is an indistinct series of images that appear to have been recorded accidentally. The video does not meet any subject matter gateway criteria in terms of s3(1) of the Films, Videos, and Publications Classification Act 1993, or deal with s3A or s3B of that Act, and must therefore be classified as unrestricted. The classification is consistent with the right to freedom of expression affirmed by the New Zealand Bill of Rights Act 1990.
